To

The Honourable Minister,

Public Works Department, Bombay.

Camp--- Girisinkop.

Subject:- Supply of Electrical power of Jog to Hangal Taluka.

Sir,

We, the undersigned residents of Hangal Taluka of Dharwar District wish to lay before you the following few lines regarding the above subject for your consideration and necessary action.

From the ~~xxxxxxxxxx~~ replies given by the Hon. Minister to the questions of Shri M.G. Gopi M.L.C. in the Bombay Legislative Council on 10-4-50 it appears that the Jog Electrical Power is expected to be supplied to the Dstricts of Kanara and Dharwar in the year 1953 and the preparation of plans and estimates are under way. We also understand that 2 main transmission lines are going to be laid, one X from Harihar to Haveri via Ranibennur and Byadgi and no new lines are proposed to be laid at present.

X from Jog to Gadag via Sirsi, Damboli, Dharwar & Hubli & Un other

We the people of Hangal Taluka were expecting the supply of Jog Power to the rice Mills and lift irrigation schemes of our Taluka. But now we are sorry to learn that our Taluka cannot get the benefit of Jog Electrical Power though our Taluka is very near to Sirsi through which the transmission line passes. The main crop of our Taluka being paddy lacs of bags of paddy is grown every year. More than 2 lacs of bags of paddy are purchased by Government every year. This taluka is supposed to be the grainary of Dharwar District and as such a large number of big rice mills are working ~~there~~ here. Some more are likely to be started shortly. There are 2 rivers Dharma and Varda running through the Taluka. As a result of propaganda carried on by Government and the assurance of

for remarks pl.

4/5/50

3-40
6/5/50.

help by Government to lift irrigation societies some lift irrigation societies are going to be formed very shortly. As a matter of fact one is working since many years and one has been formed recently. Some 3 or 4 are going to be started in a short time to irrigate thousands of acres of paddy and sugarcane lands on the banks of these 2 rivers. For all these rice mills and lift irrigation schemes Electrical power is quite necessary and people also are quite ready to take advantage of the power. We know that Government has made a contract with Mysore Government to take 1500 K.V. electrical energy from Jog via Harihar of which 1000 K. V. energy will be consumed at Ranibennur, Byadgi and Haveri and 500 K.V. energy is remaining unclaimed.

It seems that the Government has not taken this fact into consideration thinking that they might not get sufficient load if the lines are laid in this part. But that is not the fact. Peopleare very anxious to take benefit of the Electrical Power and we give assurance that sufficient Electrical energy will be consumed in this part if and when the power is made available. We have also heard that the Government has left the idea of introducing the lift irrigation on the bank of the river Tungabadra at Guttal, Irani and Timmanakatti. So we request you, Sir, to supply that unclaimed 500 K.V. energy to only AkkiAlur and Hangal, industrilized centres, for rice mills, Hullers, Cinema houses lift irrigations Saw mills and Town lightening and water supply and village lightening round about five miles of these two towns. We know that this energy will not be sufficient for these two towns. For the present we will be satisfied with this energy until we get sufficient energy via Sirsi. We give below some information as regards the electrical power that might be consumed in this part.

(1) There are 16 big rice mills working in the Taluka at present. Besides a number of rice Hullers and flour Mills are working. Some more are

likely to be started shortly. The power that these mills use is not sufficient for the present. They at least require 50 % more and 50 % more mills are going to be opened. All thesemills will certainly take advantage of the Electrical Power as soon as it is made available.

(2) There is at present, one lift irrigation plant working at Kuntanhosalli on the banks of the Dharma River since many years . One lift irrigation Society has recently been formed at Lakamapur for irrigation of 800 Acres. 3or 4 New Societies are going to be formed nery shortly.

(3) One Sugar Factory is to be started near Bommanhalli in this talukafor which permission has already been given by the Government. This Factory islikely to consume considerable quantity of Electrical Power. By the creation of the New Sugar factory, the agriculturists will surely take to lift irrigations on wells, and Varda and Dharma rivers and Dharma canal for growing sugar cane.

(4) Sericulture industry has been introduced in this talukaby Government. It is likely to be developed on a big scale and there is every likelyhood of a silk Factory being opened some years after. This industry will also require the power.

(5) There is at present one big Saw Mill at Gazipur in our Taluka and one or twoSaw benches. They will also utilize the power if made available.

(6) The policy of the Government being the development of " Grow more food campaign" agriculturists will get much advantage if they hear the radios run by the Elelctricity. Radio is considered to be one of the effective means of propanganda of securing the agricultural knowledge. Hence also the necessity of the Electrical line in this part.

Statement showing thenumber of Rice Mills Saw mills, Lift irrigations plants , Cinema Houses and town lightening is a tached herewith and also one Map

of the Hangal Taluka is attached.

For all these reasons and those that will be explained personally it is requested that this subject will ~~xx~~ get the required favourable consideration.

Yours Faithfully,

Subject :- Supply of Electrical Power of Jog to Hangal Taluka.

Sir,

We, the undersigned residents of Hangal Taluka of Dharwar District wish to lay before you the following few lines regarding the above subject for your consideration and necessary action.

From the replies given by the Honourable Minister to the ~~qu~~ questions of Shri M.G.Gopi M.L.C, in the Bombay Legislative Council on 10-4-1950 it appears that the Jog Electrical Power is expected to be supplied to the Districts of Kanara and Dharwar in the year 1953 and the prepparation of plans and estimates are under way. We also understand that 2 main transmission lines are going to be laid, one from Jog to Gadag via Sirsi, Dandoli, Dharwar and Hubli and the other from Haribar to Havari via Ranibennur and Byadgi and no new lines are proposed to be laid at present.

We the people of Hangal Taluka were expecting the supply of Jog power to the rice Mills and Lift irrigation schemes of our Taluka. But now we are sorry to learn that our Taluka cannot get the benefit of Jog Electrical Power though our Taluka is very near to Sirsi through which the transmission line passes. The main crop of our Taluka being paddy lacs of bags of paddy is grown every year. More than 2 lacs bags of paddy are purchased by Government every year. This

Taluka is supposed to be the grainary of Dharwar - District and as such a large number of big rice mills are working there. Some more are likely to be started shortly. There are 2 rivers and Dharma and Varda running through the Taluka. As a result of propaganda carried on by Government and the assurance of help by Government to lift Irrigation societies some lift irrigation societies are going to be formed very shortly. As a matter of fact one is working since many years and one has been formed recently. Some 3 or 4 are going to be started in a short time to irrigate thousands of acres of paddy and sugarcane lands on the banks of these two rivers. For all these - rice mills and lift irrigation schemes, Electrical Power is quite necessary and people also are quite ready to take advantage of the power. We know that Government has made a - contract with Mysore Government to take 1500 K.V. - ~~electrical energy from Jog via Haribar~~ of which 1000 K.V. will be consumed at Ranibennur, Byadgi and Haveri and 500 K.V. is remaining unclaimed.

It seems that the Government has not taken this fact into consideration thinking that they might not get sufficient load if the lines are laid in this part. But that is not the fact. People are very anxious to take benefit - of the Electrical power and we give assurance that - sufficient electrical energy will be consumed in this part if and when the power is made available. We have also heard that the Government has left the idea of introducing the Lift Irrigation on the bank of the River Tungabhadra at Guttal, Airani and Tammankatti. So we request you, Sir, to supply that unclaimed 500 K.V. energy to only ~~Hkt~~ Akkialur and Hangal, industrilized centres. for rice mills, Hullers, Cinema houses Lift irrigations, saw mills and Town lighting and water supply ~~irrigations, saw mills and Town~~ and village lighting round about five miles of these two -

towns. We know this energy will not be sufficient - for these two towns. For the present we will be - satisfied with this energy until we get sufficient - energy via Sirsi. We give below some information - regarding the electrical power that might be consumed in this part.

1. There are 16 big rice mills working in the Taluka at present. Besides a number of Rice Hullers and - Flour Mills are working. Some more are likely to be started shortly. The Power that these mills use is not sufficient for the present. They at least - require 50 % more and 50 % more mills are going to be opened. All these mills will certainly take - advantage of the Electrical power as soon as it is made available.

2. There is at present a Lift irrigation plant working at Kuntanhosalli on the banks of the Dharma River since many years. One Lift irrigation Society has recently been formed at Lakamapur for irrigation of 800 acres. 3 or 4 new societies are going to be formed very shortly.

3. One Sugar Factory is to be started near - Bommanhalli in this Taluka for which permission has already been given by the Government. This factory is likely to consume considerable quantity of - Electical power. By the creation of the New Sugar factory, the agriculturists will surely take to lift Irrigation on wells, Varda and Dharma Rivers and - Dharma Canal for growing sugar cane.

4. Sericulture industry has been introduced in this Taluka by Government. It is likely to be developed on a big scale and there is every likelyhood of a

silk factory being opened some years after. This industry will also require the power.

5. There is at present one big Saw Mill at Gazipur in our Taluka and one or two Saw benches. They will also utilise the power if made available.

6. The Policy of the Government being the development of " Grow more Food Campaign " Agriculturists will get much advantage if they hear the radio/s run by the Electricity. Radio is considered to be one of the effective means of propaganda of securing the agricultural knowledge. Hence also the necessity of the Electrical line in this part.

Statement showing the number of Rice Mills , Saw Mills, Lift irrigation plants, Cinema Houses and Town Lighting is attached herewith and also one map of the Hangal Taluka is attached.

For all these reasons and those that will be explained personally it is requested that this subject will get the required favourable consideration.

Yours faithfully,

Statement showing the number of rice mills, and saw mills and Cinema Houses and lift Irrigation schemes working at present at Hangal Taluka -

Akki Alur and Round about.

	Name of village	Name of Mills	H.P. of Engines.
1.	Akki-Alur	Channawiresh Rice Mill.	48 B.H.P. (12 N.H.P.)

MEMBER OF COUNCIL · WORKS MINES AND POWER ·

New Delhi,
22nd May 1950.

My dear [illegible]

I was for three days in Karnatak including Gadag, Dharwar and Hubli. Some how or other the impression created among the workers and the general public is that although an agreement has been signed with the Mysore Govt. for the supply of power the Govt. of Bombay is not taking any steps. I did my best to remove this impression and tried to impress that the Govt. of Bombay was keen but there were certain factors which must have prevented implementation. I am sending herewith a copy of the representation already sent to you by the Taluqa Congress Committee.

Yours sincerely,

(N.V.GADGIL)

Hon'ble Dr.Jivraj Mehta,
Minister for P.W.D.,
Bombay.

OFFICE OF THE
ELECTRICAL COMMISSIONER WITH
THE GOVERNMENT OF BOMBAY
Inward No. 10209
Date 1376

Below P.W.D. U.O.R. [redacted]
dated 19-5-1950, S.92/39658
S 92/43296 dated 14-6-1950.

Electric

I invite reference to Govern[redacted] No.2004/36-V-El(I) dated 11-5-50, in [redacted] Government have approved the revised [redacted]ls for the distribution of Jog power, as [redacted]ted by me in the 2 statements forwarded unde[redacted] letter No. T.8/3/23190 dated 10-1-50.

According to the revised allocation, all the 10,000 kWs available at Jog Falls has been allocated and no surplus power is available for supply to Hangal Taluka. However, it may be noted from statement I that 2500 kW is earmarked for the Hubli town in the revised allocation, as compared to only 1000 kW in the original alloca-ion. This load of 2500 kW may be reduced, as this is the only way to meet the demand of Hangal Taluka. I, therefore, propose that this load may be reduced from 2500 kW to 2000 kW and the balance of 500 kW allotted to Hangal Taluka to be supplied from the proposed Sirsi sub-station. Such a step would undoubtedly benefit a larger community. Moreover if 2000 kW proves inadequate for Hubli town supply, the deficiency can be met with by the Hubli Electric Supply Co by the use of existing Diesel sets.

Approval of the Government is requested this matter.

2. These papers contain a representation from Shri G.N.Desai, M.L.C., and others from Hangal Taluka Dist. Dharwar. They request for the supply of Jog power to the Lift Irrigation Scheme and other industries of Hangal Taluka either from Sirsi or Harihar Side. The detailed information about the irrigation schemes etc. working at present in Hangal Taluka is furnished by them at p. 1-5 ante. Please see also in this connection the D.O. letter dated the 22-5-1950, from the Hon. Shri N.V.Gadgil.

3. The remarks of the Elecl. Commr. were called for in the matter and they will be found on p. 9 ante. It will be seen from the Elecl. Commr.'s report that all the available Jog power from the Govt. of Mysore has been allocated in G.L. No.2004/36-V-El(I), dt. the 11-5-1950 and as per two statements referred to therein. There is now no surplus power available for Hangal Taluka but he has suggested that out of 2,500 kW. allocated to Hubli 500 kW. may be given for Hangal.

4. It is for orders whether this suggestion may be accepted in consultation with A.& F.D., Dev. Deptt. and Fin. Deptt.
